

**GCSS-ARM Workshop on the
Representation of Cloud Systems in
Large-Scale Models**

**20-24 May 2002
Kananaskis, Alberta, Canada**

Extended Abstracts

July 2003

<http://www.met.utah.edu/skrueger/gcss-2002/Extended-Abstracts.pdf>

Contents

Click item to open a web link to extended abstract.

The Monte Carlo Independent Column Approximation: Application within Large-Scale Models

Barker, H. W., R. Pincus, and J.-J. Morcrette

Microphysical Impacts on Idealized Cloud-Resolving Simulations of Cirrus

Philip R.A. Brown and David O’C. Starr

New Cloud and Condensate Scheme Developments in the Met Office (UK) Model

Andrew C. Bushell

Effect of horizontal resolution of radiative transfer calculations on simulations of continental and oceanic convection

Jason N.S. Cole, Marat F. Khairoutdinov, Howard W. Barker, David A. Randall, and Eugene E. Clothiaux

Impact of Aerosol Size Representation on Modeling Aerosol-Cloud Interactions

Y. Zhang, R.C. Easter, S. J. Ghan, and H. Abdul-Razzak

MJO-Like Coherent Structures in Idealized Aquaplanet Simulations

Wojciech W. Grabowski

Daytime Convective Development over Land: A Proposal for Joint WG1 and WG4 Case Based on TRMM/LBA Observations

Wojciech W. Grabowski

GCSS WG 4 Activities

Wojciech W. Grabowski

**Analysis of Ice Crystal Number Concentration Versus Aerosol
Number Concentration and Supersaturation During
FIRE.ACE**

I. Gultepe and G. A. Isaac

**Examining the Aerosol Indirect Effect in a Cloud Resolving
Model**

Huan Guo, Joyce Penner, and Michael Herzog

**Developing a Sub-Grid-Scale Layer-Cloud Parameterization:
Concept Testing**

Jack J. Katzfey

**How Might a Statistical Cloud Scheme be Coupled to a
Mass-Flux Convection Scheme?**

Stephen A. Klein, Robert Pincus, Ccile Hannay, and Kuan-Man Xu

Evaluation of AGCM Radiation Parameterizations in the Arctic

Dana E. Lane-Veron, James Pinto, and Judy Curry

Spatial Variability in Boundary Layer Clouds

Gregory M. Lewis and Philip H. Austin

Impact of the Mt. Pinatubo Eruption on Cirrus Clouds

U. Lohmann, B. Kärcher, and C. Timmreck

**Evaluation of Cirrus Properties Simulated by a Single-Column
Model Using Cloud Radar Observations and Results from a
Cloud-Resolving Model Simulation**

Yali Luo, Steven K. Krueger, Shrinivas Moorthi, and Hua-Lu Pan

**Development and Evaluation of Observationally-Based
Parameterizations of Microphysics and Radiation for
Large-Scale Models**

*Greg M. McFarquhar, Ping Yang, Andreas Macke, Anthony Baran, Sam
Iacobellis, and Richard Somerville*

Representing Cloud Vertical Structure in Large-Scale Models

Robert Pincus, Stephen A. Klein, Ccile Hannay, and Kuan-Man Xu

Effects on Solar Radiative Transfer for Stratiform Clouds due to Horizontal Variations in Cloud Liquid Water And Droplet Effective Radius

Petri Räisänen, Howard W. Barker, George A. Isaac, and Ismail Gultepe

Cloud Parameterizations: Fast Forward to the Future

David Randall and Marat Khairoutdinov

Evaluation of Upgrades to McRAS in ARM-CART SCM and GEOS GCM Environment

Y. C. Sud, and G. K. Walker

AMIP II Clouds: Agreement between Models and Observations

Bryan C. Weare

Cloud Water - Convection - Radiation Feedback Processes Appeared in a AGCM

Isamu Yagai

A Diagnostic Study of Buoyancy-Sorting Parameterizations of Shallow Cumulus Convection

Ming Zhao and Philip H. Austin
